

AMINO ACIDS

BCAA (AMINO ACIDS DRIPS)

What is **BCAA** ?

Branched-Chain Amino Acids (BCAAs) refer to three essential amino acids: **Leucine, Isoleucine, and Valine**. These amino acids are called "branched-chain" due to their unique chemical structure. BCAAs play a vital role in muscle metabolism, particularly during exercise and in times of stress, such as illness or injury.

Our Amino Acids Drip

Our Amino Acids Drip is designed to deliver essential and nonessential amino acids directly into your bloodstream. This formulation is carefully crafted to support your body's muscle protein synthesis, energy production, and overall health, especially during times of physical stress, illness, or recovery.

Essential Amino Acids

L-Leucine
L-Isoleucine
L-Valine
Lysine acetate
L-Threonine
L-Tryptophan
L-Methionine
L-Phenylalanine

Nonessential Amino Acids

L-Tyrosine
L-Arginine
L-Histidine
L-Alanine
L-Proline
L-Serine
L-Aspartic Acid
L-Glutamic Acid
L-Cysteine

Key Benefits

Muscle Recovery and Growth

Packed with vital branched-chain amino acids (BCAAs) such as L-Leucine, L-Isoleucine, and L-Valine, this package helps promote muscle recovery and prevent muscle breakdown, making it ideal for athletes or anyone recovering from injury or surgery.

Energy Boost

Amino acids like L-Arginine and L-Alanine support energy production, helping you feel more energized, especially during workouts or periods of fatigue.

Supports Immune Function

Essential amino acids, such as L-Lysine and L-Glutamic Acid, play a crucial role in maintaining your immune system's health.
